Projects

U-Travel | <https://u-travel-dt.herokuapp.com/> | <https://github.com/Nicole103/U-Travel>

Project Summary: U-Travel is a MERN app that allows users a fun way to plan for vacation. Search flights and hotels, save a packing list, add all trip expenses and keep track of how much they have saved.

Personal Responsibilities: Using Passport.js I implemented user authentication. I also implemented ReactStrap to create a fun, dynamic, and cohesive UI/UX.

Tools/Languages used: HTML5, CSS3, ReactStrap, React.js, JavaScript, Passport.js, Express, Node JS MongoDB, Mongoose, Weather API, Amadeus API

Restaurant Finder | <https://best-restaurant.herokuapp.com/> | <https://github.com/joditivis/Project2>

Project Summary: An 11 question survey takes in a user's location, cravings, dietary restrictions, favorites and more, to help find a restaurant in their area or town they are visiting.

Personal Responsibilities: Web page UI/UX

Tools/Languages used: HTML5, CSS3, JavaScript, jQuery, Node JS, Express, Handlebars, MySQL, and Sequelize ORM

Gif-ting | stacyholtz6.github.io/Gif-ting/ | github.com/joditavis/Gif-ting

Project Summary: Gif-ting allows users to improve on holiday shopping organization and gives users gif(t) ideas for each person they are shopping for.

Personal Responsibilities: Using the GIPHY API, generated a GIF based on each person's word description, as well as a gift generator which generates gift ideas relevant to each person's keyword.

Tools/Languages used: HTML5, CSS3, Bootstrap, JavaScript, jQuery, Slick Carousel, Firebase, Etsy API, GIPHY API

Education

Bootcamp Certificate: University of Denver | Denver, CO | September 2019 - March 2020

A six-month intensive web development program focused on gaining technical skills in the most up-to-date developer languages.
